

Water Testing – 3rd Party

To further enhance our diagnostic capabilities, many additional tests can be performed by our trusted third-party laboratory partners. Each location should maintain an established relationship with a partner lab and be familiar with the required sample submission procedures. In most cases, a chain-of-custody form must accompany the sample to obtain certified results.

FEE BASED

Parameter	Test Method	PN
Well Inspection	Full well workup including bacteria	WT- Point of Sale Well Inspection
Coliform Bacteria	Coliform Bacteria	80013
